## Why Us?

Entec is a proudly New Zealand owned and operated company. Over more than four decades, we have built a strong reputation for technical excellence, safety, and reliability, serving industries where operational uptime and compliance are critical, from oil & gas and mining through to food & beverage, power generation, and local government.

With over 50 years of collective experience in gas detection, our approach combines deep technical knowledge with a customer focused ethos, placing strong emphasis on building long term relationships through trust, responsiveness, and tailored solutions. Every recommendation is grounded in an understanding of the site, the gases involved, and the regulatory obligations our clients carry.

We pride ourselves on prompt responsiveness, dependable in-country service (avoiding weeks-long overseas processing), and ethical, personalised support.

Entec stands out as a premier partner for industrial clients needing world-class gas detection solutions. Our comprehensive service offering, local calibration authority, rapid response, and strong industry reputation make us a standout in safety, compliance, and operational efficiency.

Our carefully curated product range has been selected to provide safe and field-proven solutions across industry, backed by a team that stands behind every unit long after it leaves the shelf.

### Applications we can help with:

- + Confined space entry testing for oxygen, toxic, and flammable gases.
- + Fixed-point continuous monitoring, scalable from single rooms to site-wide networks.
- + Portable multi-gas detection for field and lone-worker safety.
- + Single-gas and PID/VOC detection.
- + Fleet management.
- + Connected devices, comprehensive data collection and live monitoring.
- + Continuous emission and gas data logging.
- + Custom fixed-system design for non-standard sites.

## Industries We Work In:

- + Oil & gas, offshore production, LNG/LPG, and petrochemical.
- + Emergency & First Responders
- + Construction & Tunnelling
- + Mining.
- + Engineering & heavy manufacturing: aluminum smelters, steel mills, pulp & paper.
- + Food & beverage.
- + Power generation: coal, oil, natural gas, and geothermal
- + Central & local government: water and wastewater treatment.

## Our Offering

### SALES & SUPPORT

Our range spans both portable and fixed detection equipment, selected according to the specific application rather than offered as a standardised recommendation.

Each solution is specified to suit the site, gases present, and budget, and is supported for the operational life of the equipment.

### RENTAL & LEASE

New Zealand's largest gas detector rental fleet, from single day to multi-month terms, for shutdowns, turnarounds, and emergency response.

Units are fully calibrated and ready to deploy, with flexible terms so you're only paying for equipment when you actually need it on site.

### CALIBRATION & REPAIR

Local servicing and stock holding with fast turnaround, avoiding costly delays and offshore repairs.

We carry out manufacturer-level repairs onshore, keeping your fleet compliant and in the field rather than sitting in transit.
